

ARCHI SNEHI

Backend Developer

+91-9508864261 | archisnehi@gmail.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

Backend developer focused on **FastAPI**, **PostgreSQL**, and **Django**. Have built **multi-tenant** architectures, **row-level-secure** data isolation, OAuth/JWT authentication, and a **WebSocket-based real-time chat system** from scratch.

EXPERIENCE

Software Developer Intern, Ideactra Social

Apr 2026 – Jun 2026

FastAPI · PostgreSQL · React · JavaScript

- Designed the **PostgreSQL schema** and built a **WebSocket-based real-time chat system** from scratch to handle user and engagement data.
- Built **20+ REST APIs** covering auth, user profiles, content publishing, and social networking features for a live platform.
- Replaced the manual login flow used at launch with **Google OAuth 2.0**, **GitHub OAuth**, and **JWT-based authentication**.

Python & Web Development Intern, HashedBit Innovations

May 2024 – Jul 2024

Python · Django · MySQL · JavaScript

- Owned the backend for **DressHub**, a fashion e-commerce platform, building the product catalog, cart, checkout, and order tracking modules.
- Built an **inventory sync pipeline** to prevent overselling during concurrent checkouts, keeping stock counts consistent across simultaneous orders.
- Implemented **product search & filtering** and real-time size/inventory validation so customers never see stock that's already sold out.

PROJECTS

HireSenseAI – AI Resume Screening Platform

Jan 2025 – Mar 2025

FastAPI · PostgreSQL · NLP · Python · JavaScript | [GitHub](#) | [Live Demo](#)

- Built an **AI resume screener** using FastAPI and NLP that parses resumes, scores them against a job description, and flags skill gaps.
- Added a **chatbot** for recruiters to query candidate fit and resume details conversationally instead of digging through dashboards.
- Exposed **30+ APIs** covering recruiter dashboards, candidate ranking, and ATS scoring in one FastAPI service.
- Designed the **PostgreSQL schema** to store parsed resume data, job postings, and match scores for repeat evaluation without re-parsing.

ShopTrackr – Multi-Tenant Retail SaaS

Mar 2025 – Present

FastAPI · PostgreSQL · Python · JavaScript | [GitHub](#)

- Built a **multi-tenant backend** where each business gets isolated data, separate billing logic, and its own inventory state.
- Implemented **row-level access control** in PostgreSQL so one tenant's data is never exposed to another, even on shared infrastructure.
- Added automated reporting for stock levels, credit balances, and payment history, exportable per tenant on demand.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, JavaScript

Backend: FastAPI, Django, REST APIs, JWT, PostgreSQL, MySQL, SQLAlchemy

Frontend: React.js, HTML, CSS, Tailwind CSS

Cloud/Tools: AWS, Docker, Git, GitHub, Postman

Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks

System Design: Client-Server, Caching, Load Balancing, DB Scaling

EDUCATION

Master of Computer Applications (MCA), Jaypee Institute of Information Technology

2025 – 2027

CGPA: 8.24

Bachelor of Computer Applications (BCA), Greater Noida Institute of Technology

2022 – 2025

CGPA: 7.94

ACHIEVEMENTS

- 1st Place** among 30+ teams at Inter-College Tech Fest for a Voice-Controlled Smart Wheelchair — hardware + software integration project.
- Winner**, Department Technical Competition — built a Cross-Chain NFT Platform with cross-network token transfer.
