

ARCHI SNEHI

Software Engineer | Backend Developer

+91-9508864261 | archisnehi@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Backend Software Engineer specializing in **AI-powered, real-time systems** — architecting **REST APIs**, **authentication**, and **relational database** models that hold up in production. Builds end-to-end, from **WebSocket**-based messaging services to **LLM**-integrated engineering platforms, with an emphasis on system design over surface-level API integration.

EXPERIENCE

Software Developer Intern, Ideactra Social | [Live Demo](#)

Apr 2026 – Jun 2026

FastAPI · PostgreSQL · React · WebSockets · Gemini API · RAG · JavaScript

- Engineered core backend infrastructure for Ideactra Social, a live social platform — architecting **REST APIs** and relational **database models** spanning user profiles, content publishing, networking, and engagement workflows.
- Implemented Google **OAuth 2.0**, GitHub OAuth, and **JWT**-based authentication, replacing the launch login flow with a unified and secure authentication system.
- Architected a **WebSocket**-based real-time messaging system handling conversation management, message persistence, and live presence tracking, and integrated a **RAG**-powered AI assistant using the **Gemini API** to answer questions from platform and user content.

Software Developer Intern, HashedBit Innovation

May 2024 – Jul 2024

Django · Python · MySQL · REST APIs

- Architected backend services for an e-commerce platform, designing **REST APIs** and relational **database models** for products, inventory, customers, and order management.
- Delivered **authentication**, product catalog management, shopping cart, and order processing — enabling end-to-end online purchasing.
- Engineered concurrency-safe inventory management to preserve stock consistency and prevent overselling during simultaneous purchase requests.

PROJECTS

DevWorkspaceX – AI-Native Software Engineering Platform | [GitHub](#) | [Live Demo](#)

May 2026 – Present

Next.js · React · FastAPI · PostgreSQL · Docker · JWT · Groq API · RAG

- Architected an AI-native software engineering platform that transforms product ideas into production-ready engineering blueprints — generating software requirements (**SRS**), high- and low-level design documents, **database schemas**, **REST API** specifications, user stories, and implementation roadmaps.
- Delivered a collaborative, AI-powered development workspace — with project planning, Kanban-based sprint tracking, and **role-based access control** — embedding AI across documentation generation, sprint planning, and technical assistance to accelerate engineering workflows.
- Integrated a context-aware engineering assistant powered by a **RAG** pipeline and the **Groq API**, retrieving project knowledge to support AI-assisted software development on top of a modular, client-server backend with **JWT** authentication and a relational **PostgreSQL** architecture.

HireSenseAI – AI Recruitment Intelligence Platform | [GitHub](#) | [Live Demo](#)

Jan 2025 – Mar 2025

React · FastAPI · PostgreSQL · SQLAlchemy · Groq API

- Engineered an AI recruitment intelligence platform that automates ATS evaluation through resume parsing, job description matching, and semantic skill-gap analysis, surfacing personalized recommendations for candidates.
- Integrated **LLM**-powered workflows and a **RAG** pipeline using **Groq LLMs** to deliver context-aware resume insights, recruiter assistance, and career guidance.
- Delivered secure, **JWT**-authenticated **APIs** backed by a relational **PostgreSQL** data model, supporting resume management, analysis history, and scalable candidate evaluation workflows.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, JavaScript

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend: FastAPI, Django, RESTful APIs, SQLAlchemy, JWT, OAuth 2.0, WebSockets

Databases: PostgreSQL, MySQL

AI & LLM: Groq API, Gemini API, RAG, Prompt Engineering, AI Workflow Automation

Cloud & DevOps: Docker, AWS (EC2, S3), Git, GitHub, Render, Vercel, Postman

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

System Design: Client-Server Architecture, Modular Backend Architecture, Database Schema Design, Authentication & Authorization, Role-Based Access Control (RBAC), Caching

EDUCATION

Master of Computer Applications (MCA), Jaypee Institute of Information Technology

2025 – 2027

CGPA: 8.24

Bachelor of Computer Applications (BCA), Greater Noida Institute of Technology

2022 – 2025

CGPA: 7.94

ACHIEVEMENTS

- 1st Place** among 30+ teams at Inter-College Tech Fest for a **Voice-Controlled Smart Wheelchair** — hardware + software integration project.
- Winner**, Department Technical Competition — engineered a **Cross-Chain NFT Platform** with cross-network token transfer.
